LETTER OF RECOMMENDATION

I have been called upon to provide a reference for **Mr. Saiprakash Reddy Rayavaram**, and it gives me great satisfaction to do so. I had the pleasure of being his professor of **Applied Thermodynamics and Refrigeration and Air conditioning** during his undergraduate studies at Rajiv Gandhi University of Knowledge Technologies, Kadapa. I also had a glimpse of his strong skills of methodical and systematic thinking while he worked on various projects and assignments. Saiprakash carried a favourable reputation due to his notable attentiveness, punctuality, and sincerity.

He often participated in class discussions and helped other students clear their doubts. This highlighted his exceptional ability to engage in collaborative teamwork. His passion for learning led him to optimise his learning experience. His excellent command of the subject revealed his passion for **technical knowledge**. He exhibited exceptional proficiency in **ANSYS fluent flow**, which he used for solving thermal and fluid problems. His consistent growth in academic and technical proficiency saw him achieve tremendous success in his Bachelor's program.

As **internal guide** for Mr. Saiprakash and **Head of the Design Innovation Centre** I had sent him to **internship** as a **Jr. Design Engineer** in **Radiant Elastomers Pvt Ltd**. He did a good job at internship and presented his work as a thesis in his final year. It was a great pleasure to watch Saiprakash demonstrate his organising and **management skills** during the **DIC Tech fest**. He was one of the volunteers and helped in forging new design ideas for the participants. I could observe the agility of his mind during this event, as he used his **quick-thinking skills** to make sharp decisions.

Saiprakash has the necessary skills for the challenging task of acquiring a Master's degree. His determination and demonstrated strengths make him a highly eligible candidate for this opportunity. His ability to work effectively and his good thinking skills will render him a successful and productive learner. He possesses all the qualities to realise his professional and academic goals and is therefore an ideal candidate for this graduate degree. If you require further information regarding this letter of recommendation, please do not hesitate to reach out to me.
